

**BANARAS HINDU UNIVERSITY**

Under Graduate — Semester I Examination, 2024-25 (NEP)

**Value Added Course (VAC)****Paper Code: BHUVA-12 : Environmental Science (End Term)**

Time: 1.5 Hours

Maximum Marks: 70

REFNO. CE/Conf./D/231

*Instructions: Answer all 70 Multiple Choice Questions. Each question carries equal marks (1 mark each).*

**Question 1.** The major material used for making tools during the Neolithic Period was:[1/

- (A) Bronze
- (B) Polished stone
- (C) Steel
- (D) Iron

**Question 2.** The current human population across the globe is approximately: [1/

- (A) 6.9 billion
- (B) 7 billion
- (C) 9.5 billion
- (D) 8.2 billion

**Question 3.** Anthropocentrism states that: [1/

- (A) All living beings have intrinsic value
- (B) Human beings are the central or most significant entities in the world
- (C) Ecosystems have legal rights
- (D) Non-human entities have superior rights

**Question 4.** The main objective of environmental education is to: [1/

- (A) Increase industrial growth
- (B) Promote environmental awareness and sustainable action
- (C) Promote urbanization
- (D) Reduce agricultural production

**Question 5.** Biomagnification refers to: [1/

- (A) Increase in concentration of toxic substances up the food chain
- (B) Increase in population of a species
- (C) Growth of plants using fertilizers
- (D) Increase in atmospheric temperature

**Question 6.** In India, the agency which is responsible for monitoring and controlling pollution at the national level is: [1]

- (A) NITI Aayog
- (B) Central Pollution Control Board (CPCB)
- (C) Supreme Court
- (D) Ministry of Earth Sciences

**Question 7.** The lowermost layer of the atmosphere where we live is called: [1]

- (A) Mesosphere
- (B) Troposphere
- (C) Stratosphere
- (D) Thermosphere

**Question 8.** The term "Biosphere" refers to: [1]

- (A) The zone of Earth where life exists
- (B) The gaseous envelope surrounding Earth
- (C) The solid rock layer of Earth
- (D) All oceans and freshwater bodies

**Question 9.** Which of the following is a primary air pollutant? [1]

- (A) Ozone
- (B) Carbon monoxide
- (C) Smog
- (D) Peroxyacetyl nitrate (PAN)

**Question 10.** Deforestation leads to: [1]

- (A) Increase in soil fertility
- (B) Loss of biodiversity and soil erosion
- (C) Decrease in atmospheric carbon dioxide
- (D) Increase in rainfall

**Question 11.** An ecosystem consists of: [1]

- (A) Only biotic components
- (B) Only abiotic components
- (C) Interactions between biotic and abiotic components
- (D) Only decomposers

**Question 12.** What do you mean by the term pollution? [1]

- (A) The natural process of ecosystem balance
- (B) The undesirable change in the environment due to harmful substances
- (C) The increase in biodiversity in an area
- (D) The sustainable use of natural resources

**Question 13.** Acid rain is primarily caused by emissions of: [1]

- (A) Carbon dioxide and methane
- (B) Sulfur dioxide and nitrogen oxides
- (C) Chlorofluorocarbons
- (D) Oxygen and nitrogen

**Question 14.** Ozone depletion can lead to: [1]

- (A) Increased risk of skin cancer due to UV radiation
- (B) Global cooling
- (C) Increased soil nitrogen content
- (D) Reduction in ocean salinity

**Question 15.** COVID-19 is an example of: [1]

- (A) Pandemic
- (B) Epidemic
- (C) Endemic
- (D) None of the above

**Question 16.** Which of the following is a major cause of soil pollution? [1]

- (A) Overuse of chemical fertilizers
- (B) Application of cow dung
- (C) Drip irrigation

(D) Planting more trees

**Question 17.** Which of the following is an example of a natural disaster? [1]

(A) Earthquake

(B) Oil spill

(C) Nuclear accident

(D) Gas leak

**Question 18.** The concept of Sustainable Development emphasizes: [1]

(A) Meeting present needs without compromising future generations

(B) Maximizing resource exploitation today

(C) Stopping all industrial activities

(D) Focusing only on economic growth

**Question 19.** Greenhouse effect is primarily caused by: [1]

(A) Trapping of heat by greenhouse gases in the atmosphere

(B) Depletion of topsoil

(C) Excessive rainfall

(D) Cooling of ocean currents

**Question 20.** Which of the following is a non-renewable energy source? [1]

(A) Solar energy

(B) Coal

(C) Wind energy

(D) Hydroelectric power

**Question 21.** The term "Ecosystem" was coined by: [1]

(A) Arthur Tansley

(B) Charles Darwin

(C) Ernst Haeckel

(D) Eugene Odum

**Question 22.** What is the main reason for air pollution? [1]

(A) Industrial emissions and vehicular exhaust

(B) Tree plantation

- (C) Use of electric vehicles
- (D) Use of microbial fertilizers

**Question 23.** Which of the following is a major threat to biodiversity? [1]

- (A) Over-exploitation of natural resources and habitat loss
- (B) Tree plantation drives
- (C) Organic farming
- (D) Wildlife sanctuary creation

**Question 24.** Ramsar Convention is an international treaty for the conservation of: [1]

- (A) Wetlands
- (B) Deserts
- (C) Forests
- (D) Coral reefs

**Question 25.** Chipko Movement in India was aimed at: [1]

- (A) Protecting trees from being cut down
- (B) Cleaning rivers
- (C) Reducing plastic usage
- (D) Wildlife protection

**Question 26.** Eutrophication in water bodies is caused by excess of: [1]

- (A) Nutrients like nitrogen and phosphorus
- (B) Heavy metals like lead
- (C) Dissolved oxygen
- (D) Salt content

**Question 27.** What is the main reason for water pollution? [1]

- (A) Interlinking of rivers
- (B) Sustainable agricultural practices
- (C) Industrial effluents and untreated sewage
- (D) Floods

**Question 28.** Which of the following is a decomposer in an ecosystem? [1]

- (A) Plants

- (B) Elephant
- (C) Crow
- (D) Microorganisms (Bacteria and Fungi)

**Question 29.** Which of the following is a renewable source of energy? [1]

- (A) Coal
- (B) Natural gas
- (C) Solar energy
- (D) Petroleum

**Question 30.** Which layer of the atmosphere contains the ozone layer? [1]

- (A) Troposphere
- (B) Stratosphere
- (C) Mesosphere
- (D) Thermosphere

**Question 31.** Minamata disease was caused by environmental poisoning of: [1]

- (A) Mercury
- (B) Lead
- (C) Cadmium
- (D) Arsenic

**Question 32.** Among the following, which one constitutes the major proportion of Earth's interior by volume? [1]

- (A) Crust
- (B) Mantle
- (C) Core
- (D) Lithosphere

**Question 33.** The possible consequence of unplanned urbanization is: [1]

- (A) Generation of excessive waste
- (B) Increase in air pollution
- (C) Social inequality
- (D) All of the above

**Question 34.** Biodiversity hotspot refers to a region with: [1]

- (A) High level of endemic species under threat
- (B) Low species richness
- (C) Only marine life
- (D) Extinct species

**Question 35.** Which gas is predominantly responsible for global warming? [1]

- (A) Carbon dioxide (CO<sub>2</sub>)
- (B) Oxygen (O<sub>2</sub>)
- (C) Nitrogen (N<sub>2</sub>)
- (D) Argon (Ar)

**Question 36.** Noise pollution is measured in units of: [1]

- (A) Hertz (Hz)
- (B) Decibel (dB)
- (C) Watt (W)
- (D) Joule (J)

**Question 37.** The United Nations Sustainable Development Goals (SDGs) consist of: [1]

- (A) 15 goals
- (B) 16 goals
- (C) 17 goals
- (D) 18 goals

**Question 38.** Which of the following is an essential role of soil? [1]

- (A) Provides nutrients and water for plants
- (B) Powers winds and ocean currents
- (C) Filters air for human survival
- (D) Provides renewable energy source

**Question 39.** What is the main characteristic of a non-renewable resource? [1]

- (A) It replenishes naturally at a very fast rate
- (B) It gets exhausted upon continuous usage
- (C) It can never be depleted
- (D) It produces zero waste

**Question 40.** Which instrument is used to measure earthquake intensity/magnitude? [1]

- (A) Barometer
- (B) Seismograph / Richter Scale
- (C) Thermometer
- (D) Anemometer

**Question 41.** Which of the following is an example of habitat fragmentation? [1]

- (A) Creation of new wildlife reserves
- (B) Construction of roads and dams through forests
- (C) Restoration of wetlands
- (D) Afforestation programs

**Question 42.** Which type of ecosystem is characterized by permafrost and treeless landscapes? [1]

- (A) Grasslands
- (B) Deserts
- (C) Tundra
- (D) Wetlands

**Question 43.** What is the primary consequence of thermal pollution in water bodies? [1]

- (A) Decrease in dissolved oxygen levels
- (B) Increase in fish growth rate
- (C) Purification of water
- (D) Freezing of water surface

**Question 44.** Which environmental movement in Karnataka was inspired by the Chipko Movement? [1]

- (A) Appiko Movement
- (B) Narmada Bachao Andolan
- (C) Silent Valley Movement
- (D) Jungle Bachao Andolan

**Question 45.** Kyoto Protocol is an international agreement focused on: [1]

- (A) Reducing greenhouse gas emissions
- (B) Banning hazardous chemical trade

- (C) Protecting endangered birds
- (D) Disposal of electronic waste

**Question 46.** Solid waste management strategy "3 Rs" stands for: [1]

- (A) Reduce, Reuse, Recycle
- (B) Read, Research, Report
- (C) Remove, Replace, Restore
- (D) Refine, React, Rebuild

**Question 47.** What is the primary role of the National Green Tribunal (NGT) in India? [1]

- (A) Promote primary education
- (B) Handle environmental disputes and enforce legal rights
- (C) Encourage rapid industrialization
- (D) Reduce poverty

**Question 48.** The United Nations Environment Programme (UNEP) headquarters is located in: [1]

- (A) Geneva
- (B) Nairobi
- (C) New York
- (D) Paris

**Question 49.** Primary consumers in a food chain are also known as: [1]

- (A) Herbivores
- (B) Carnivores
- (C) Omnivores
- (D) Decomposers

**Question 50.** Carrying capacity of an environment refers to: [1]

- (A) Maximum population size that an environment can sustain indefinitely
- (B) Total weight of soil in an area
- (C) Speed of ocean currents
- (D) Maximum rainfall recorded

**Question 51.** Earth Day is celebrated globally every year on: [1]

- (A) 15th May

- (B) 22nd May
- (C) 22nd April
- (D) 1st April

**Question 52.** The national animal of India is: [1]

- (A) The Royal Bengal Tiger
- (B) Lion
- (C) Elephant
- (D) One-horned Rhinoceros

**Question 53.** The LiFE (Lifestyle for Environment) Mission launched by India is about: [1]

- (A) Providing insurance to economically weaker sections
- (B) Adopting nature-friendly lifestyle for environmental protection
- (C) Literacy mission
- (D) Farmer loan waiver

**Question 54.** The lithosphere is: [1]

- (A) The solid, outermost rocky layer of the Earth
- (B) The water component of the Earth
- (C) The gaseous envelope of the Earth
- (D) The oceanic trench part

**Question 55.** Which of the following is an urban development mission in India? [1]

- (A) AMRUT Mission
- (B) HRIDAY Mission
- (C) Smart Cities Mission
- (D) All of the above

**Question 56.** Which of the following is a major reason for human migration? [1]

- (A) Better employment opportunities and living conditions
- (B) Absence of technology
- (C) High pollution levels
- (D) Voluntary isolation

**Question 57.** World Environment Day is observed on: [1]

- (A) 5th June
- (B) 11th July
- (C) 1st December
- (D) 16th September

**Question 58.** World Ozone Day is celebrated on:

[1]

- (A) 16th September
- (B) 22nd March
- (C) 5th June
- (D) 22nd April

**Question 59.** Which of the following is a water-borne disease?

[1]

- (A) Cholera
- (B) Arthritis
- (C) Common cold
- (D) Cough

**Question 60.** Which of the following is a clear indicator of global climate change?

[1]

- (A) Melting of glaciers and ice-caps
- (B) Decreasing ocean levels
- (C) Monotone weather patterns
- (D) Decreasing global average temperature

**Question 61.** The direct and indirect benefits that humans derive from ecosystems are called:

[1]

- (A) Ecosystem services
- (B) Ecosystem structure
- (C) Ecosystem regeneration
- (D) Ecosystem degradation

**Question 62.** Photovoltaic cells convert solar energy directly into:

[1]

- (A) Electrical energy
- (B) Chemical energy
- (C) Thermal energy
- (D) Nuclear energy

**Question 63.** In an ecological pyramid, producers belong to which trophic level? [1]

- (A) First Trophic Level
- (B) Second Trophic Level
- (C) Third Trophic Level
- (D) Fourth Trophic Level

**Question 64.** Which of the following is an example of ex-situ conservation? [1]

- (A) Botanical Gardens and Seed Banks
- (B) National Parks
- (C) Biosphere Reserves
- (D) Wildlife Sanctuaries

**Question 65.** Project Tiger was launched in India in the year: [1]

- (A) 1973
- (B) 1986
- (C) 1992
- (D) 2001

**Question 66.** In a food web, the maximum energy resides at the level of: [1]

- (A) Primary consumers
- (B) Secondary consumers
- (C) Tertiary consumers
- (D) Producers

**Question 67.** Which international organization publishes the Red List of Threatened Species? [1]

- (A) IUCN
- (B) Ministry of Environment, Forest & Climate Change
- (C) Central Pollution Control Board
- (D) Ministry of Earth Sciences

**Question 68.** Wild Life Protection Act in India was enacted in: [1]

- (A) 1972
- (B) 1980
- (C) 1986

(D) 1998

**Question 69.** Which gas released during the Bhopal Gas Tragedy in 1984 caused thousands of deaths? [1]

(A) Methyl Isocyanate (MIC)

(B) Phosgene

(C) Carbon Monoxide

(D) Mustard Gas

**Question 70.** The main objective of Project Elephant launched in 1992 in India is to: [1]

(A) Protect wild elephants and their natural habitats/corridors

(B) Domesticate elephants for transport

(C) Export elephants to zoos

(D) Promote elephant safaris
