

BANARAS HINDU UNIVERSITY

B.Sc. — Semester IV Mid-Semester Examination, 2025-26 (NEP)

CHEMISTRY

Paper Code: CHEMJ44 : Techniques in Chemistry (Mid-Semester)

Time: 1 Hour

Maximum Marks: 20

Instructions: Attempt all questions. The figures in the right-hand margin indicate marks.

Question 1. Describe the principle and working of column chromatography with a diagram. What is the role of stationary and mobile phases? [5]

Question 2. What is differential extraction? Explain the role of immiscible solvents in this technique. [5]

Question 3. Describe the process of steam distillation with a diagram. For what type of organic compounds is this method particularly useful? [5]

Question 4. Define crystallization. What factors affect the purity and yield of crystals obtained? [2.5]

Question 5. What is precipitation in organic chemistry, with examples? How does it differ from the crystallization of compounds? [2.5]
