

B. Sc. (Hons) Semester IV Examination 2018-19
GEOLOGY

Paper No. GLB-401 : Palaeontology and Stratigraphy

Time: 3 hours

Full Marks: 70

Note: Answer five questions in all, selecting two each from Sections A and B, and Section-C which is compulsory. All questions carry equal value.

Section-A

1. Define the science of Paleontology. Describe its close structural relationship with other sub-disciplines and practical fields of Geology.
 2. With the aid of neat sketches, discuss the detailed skeletal morphology, internal structures, and geological distribution of the class Echinoidea.
 3. Explain in detail the major stratigraphic divisions of India. Draw a representative outline map of India and show the appropriate geographic distribution of these stratigraphic units.
 4. Briefly explain the Vindhyan Supergroup of rocks with special emphasis on its comprehensive stratigraphic classification, component lithology, and historical economic importance.
-

Section-B

1. Write brief geological notes on any **two** of the following:
 - (a) Elementary scientific ideas about the origin of life on Earth
 - (b) Different morphological features observed in the cephalon of trilobites
 - (c) Economic importance and mineral deposits of the Cuddapah Supergroup
 2. Write brief geological notes on any **two** of the following:
 - (a) Temporal and spatial geological distribution of trilobites
 - (b) Stratigraphy and depositional history of the Indo-Gangetic Plain
 - (c) Chrono-stratigraphic classification table of the Aravalli Craton
 3. Answer the following structural regional questions:
 - (a) Discuss in detail the various lithological units and rock groups of the Dharwar Craton.
 - (b) Explain the broad geological, physiographic, and structural divisions of the Himalaya.
-

Section-C

Compulsory Section: Define the following terms in 1-5 sentences each:

1. Fossil
2. Index fossil
3. Supergroup
4. Full name of the acronym CITZ

5. Geological Age of the Kurnool Group
 6. Write the names of two primary peninsular rivers of India
 7. Write the name of the oldest known rock unit inside the Dharwar Craton
