

BANARAS HINDU UNIVERSITY

B.Com. (Hons.) FMM — Semester I Examination, 2013-14

Paper No. BCF-116: Business Statistics

Time: 3 Hours

Maximum Marks: 70

Instructions: Answer all questions. All questions carry equal marks (14 marks each).

Question 1. “Data are like clay out of which you can make a God or a Devil as you please.”
Discuss. [14]

OR

Discuss in brief, the methods generally used in the collection of primary data. [14]

Question 2. An incomplete distribution is given as follows:

Class Interval	Frequency
10–20	12
20–30	30
30–40	?
40–50	65
50–60	?
60–70	25
70–80	18
Total ($\sum f$)	229

Find the missing frequencies, if the median is 46.

[14]

OR

What is statistical average? Explain the properties of a good average.

[14]

Question 3. What do you mean by dispersion? Discuss the various methods of measuring dispersion. Also discuss their relative merits and demerits.

[14]

OR

Calculate standard deviation from the following series:

Marks (more than)	0	10	20	30	40	50	60	70
No. of students	100	90	75	50	20	10	5	0

[14]

Question 4. What is ‘time series’? Describe briefly the various methods of measurement of secular trend. [14]

OR

Fit a straight line trend by the method of least squares in the following series:

Year	2001	2002	2003	2004	2005	2006
Production	7	10	12	14	17	24

[14]

Question 5. Define index number and describe in detail its uses. [14]

OR

From the data given below, construct Fisher’s ideal index number:

Commodities	2009		2010	
	Price (per unit)	Expenditure (in Rs.)	Price (per unit)	Expenditure (in Rs.)
A	2	40	5	75
B	4	16	8	40
C	1	10	2	24
D	5	25	10	60
