

BANARAS HINDU UNIVERSITY

B.Com. (Hons.) — Semester III Examination, 2016-17

Paper No. BCH-216: Business Statistics

Time: 3 Hours

Maximum Marks: 70

Instructions: Answer all questions. All questions carry equal marks (14 marks each).

Question 1. Discuss the uses of statistics for economic analysis and planning with special reference to India. [14]

OR

Discuss the Questionnaire and schedule methods of data collection along with their merits and limitations. [14]

Question 2. From the following data, calculate the range of marks obtained by middle 50% of the students: [14]

oprule Marks (More than)	0	10	20	30	40	50
No. of Students	100	92	80	40	20	6
ottomrule						

OR

A train runs 25 kms. at a speed of 30 kms. per hour, another 50 kms. at a speed of 40 kms. per hour, then due to repair of track travels for 6 minutes at a speed of 10 kms. per hour and finally covers 24 kms. at a speed of 24 kms. per hour. What is the average speed (in kms.) per hour? [14]

Question 3. A purchasing agent obtained samples of incandescent lamps from two suppliers. He had the samples tested in his own laboratory for the length of life with the following results:

oprule Length of Life in Hours	Samples From	
	Company A	Company B
700 and under 900	10	3
900 and under 1100	16	42
1100 and under 1300	26	12
1300 and under 1500	8	3
ottomrule		

Which company's lamps are more uniform? [14]

OR

What do you understand by skewness? Point out their role in analyzing a frequency distribution. [14]

Question 4. What is Spearman's Rank Correlation Co-efficient? Bring out its usefulness. [14]

OR

Calculate Karl Pearson's coefficient of correlation from the following data: [14]

oprule X	6	2	10	4	8
Y	9	11	5	8	7
ottomrule					

Question 5. What is Regression Line? How it can be measured? [14]

OR

The following data based on 450 students are given for marks in Statistics and Economics at a certain examination. Find two regression lines and estimate the average marks in Economics of the candidates who obtained 50 marks in statistics: [14]

oprule	Statistics	Economics
Mean marks	40	48
Standard deviation	12	16
ottomrule		

Sum of products of deviations of marks from their respective means = 42,075.
