

BANARAS HINDU UNIVERSITY

B.Sc. (Hons.) — Semester IV Examination, 2023-24

Paper No. GRB-403A: Basics of Remote Sensing

Time: 3 Hours

Maximum Marks: 70

Ref. No.: 074555

*Instructions: Answer **five** questions in all including Question 1 which is compulsory. Remaining questions are of equal marks.*

Question 1. Write short notes on the following: [20]

- (a) Rayleigh scattering
- (b) Characteristics of oblique aerial photographs.
- (c) Electromagnetic radiation.
- (d) Sun-synchronous satellites.
- (e) Use of association in visual image interpretation.

Question 2. Explain the interaction mechanism of electromagnetic radiations with the atmosphere. [12.5]

Question 3. Explain the characteristics of different platforms used in remote sensing. [12.5]

Question 4. Write a note on digital image processing techniques. [12.5]

Question 5. Describe the steps and procedures involved in image interpretation. [12.5]

Question 6. Identify and discuss the various applications of remote sensing in management of forest resources. [12.5]

Question 7. Discuss the characteristics of any three sensors used in Indian remote sensing satellites. [12.5]

Question 8. Explain the interaction mechanism of electromagnetic radiations with Earth's surface features. [12.5]
