

BANARAS HINDU UNIVERSITY
B.A. (Hons.) Semester I Examination, 2022-23

Paper No. BAS-101: Applied Statistics

Time: 3 Hours

Maximum Marks: 70

*Instructions: Answer **five** questions including Question 1 which is compulsory. Symbols have their usual meanings.*

BAS - 101 : Statistical Methods N **Question 1.**

- (a) Write the definition of statistics with its limitations.
 - (b) Define the terms: Categorical Variable; Discrete and Continuous data; Interval and Ratio scale of measurement
-

Question 2.

- (a) What is difference between Primary & Secondary data?
 - (b) Discuss different ways of presenting the data with examples. a
-

Question 3.

- (a) Write different steps in preparing grouped frequency distribution table. ∴
 - (b) What are different ways of presenting the data graphically?
-

Question 4.

- (a) What is the purpose of measures of central tendency and variability?
 - (b) What are the different measures of central tendency? Discuss the measures with their merits and demerits.
-

Question 5.

- (a) Define coefficient of variation? What purpose does it serve?
 - (b) Discuss absolute and relative measures of dispersion.
-

Question 6.

- (a) . Define moments. Distinguish between raw and central moments.
 - (b) What do you mean by positively and negatively skewed distribution. Also discuss various measures of skewness.
-

Question 7.

- (a) What is scatter diagram?How is it useful in the study of correlation?
 - (b) Distinguish between linear and non-linear correlation. Mention important properties of correlation coefficient. Write short notes on any two of the following:
-

Question 8.

- (a) Measure of Kurtosis
- (b) Yule's Coefficient of Association
- (c) Uses of Regression Analysis
