

BANARAS HINDU UNIVERSITY

B.A./B.Sc. (Hons.) Semester V Examination, 2013-14

Paper No. STA/STB-501: Applied Statistics

Time: 3 Hours

Maximum Marks: 70

*Instructions: Answer any **five** questions. All questions carry equal marks. Symbols have their usual meanings.*

Question 1.

- (a) What are the methods of obtaining Vital Statistics? Also give the uses of Vital Statistics. [7]
- (b) Give a brief history of the Census of India. [7]

Question 2.

- (a) What do you mean by a life table? Discuss the relationships among the various columns of a complete life table. [7]
- (b) Define Gross Reproduction Rate (GRR) and Net Reproduction Rate (NRR). Explain how far they can be considered as indices of population growth. Interpret the following:
- (i) $GRR = 2.10$, $NRR = 1.10$
 - (ii) $GRR = 1.15$, $NRR = 1.10$
 - (iii) $GRR = 1.75$, $NRR = 1.80$
- [7]

Question 3.

- (a) Define crude death rate and point out its limitations. Explain clearly the standardised death rates, including the methods of their computation. [7]
- (b) Discuss about the logistic curve used for measuring the growth of a population. [7]

Question 4.

- (a) Define infant mortality rate. Why do we need to adjust the infant mortality rate? Describe in detail the Logan method of adjustment of the infant mortality rate. [7]
- (b) Discuss the importance and limitations of index numbers. [7]

Question 5.

- (a) What is the need for a family budget enquiry in the construction of the cost of living index number? [7]
 - (b) Define the time reversal test. Show that Fisher's index number satisfies the time reversal test. [7]
-

Question 6.

- (a) What are control charts? Describe the main principles of Statistical Quality Control (SQC) charts. Discuss the need and utility of SQC in industry. [7]
 - (b) Describe control charts for mean ($\bar{X}$ -chart) and standard deviation (S -chart). [7]
-

Question 7.

- (a) What do you mean by time series? What are its uses? [7]
 - (b) Explain the additive and multiplicative models of time series, stating clearly the assumptions underlying each. [7]
-

Question 8.

- (a) Discuss in detail the construction of the p -chart and c -chart for attributes in statistical quality control. [7]
 - (b) Explain the moving average method of trend elimination. How does one choose the appropriate length of the moving average? [7]
-
